My Personal Way of Landing a Piper Cherokee (Perfectly, Every Time) - Ray Steelman, Crusty Old Pilot - My Personal Way of Landing a Piper Cherokee (Perfectly, Every Time) - Ray Steelman, Crusty Old Pilot by Ray Steelman 94,267 views 5 years ago 3 minutes, 42 seconds - Aviation, videos of simple legacy **aircraft**, (like a Cessna 150, 152, Piper Warrior, Piper Cherokee or Piper Tomahwak) presented by ...

How to Land a Piper Cherokee Perfectly, Every Time

I keep seeing folks landing Piper Cherokees by cutting the throttle and drifting down to the runway.

Chopping the throttle and gliding down to the runway is not mine!

I learned the following method of landing an airplane while flying high performance and complex airplanes that weighed a lot.

If a pilot chopped the throttle and drifted down, the heavier planes would slam into the runway and you would be replacing landing gear fairly often.

Airplanes are not kites! Once the throttle is cut to idle, you are at the mercy of the winds. In strong crosswinds, you will be lucky to even hit the runway.

I have over 650 hours flying different Piper Cherokees.

I think that if you practice flying the plane all of the way to the ground and cutting power when the wheels touch, your landings will greatly improve.

Turning Base. 90 mph. Second notch of flaps.

Turning Final 90 mph until short final.. then 80 mph.

Full Flaps when the runway is made.

Over the numbers at 70 mph. Rise the nose (flare), and touch down at 65 mph.

Use power to control the airplane and stay on the centerline.

How To Rebuild The Piper Cherokee Brake Master Cylinder The Cheap Way!! - How To Rebuild The Piper Cherokee Brake Master Cylinder The Cheap Way!! by SamuelTheAviator 4,499 views 3 years ago 12 minutes, 3 seconds - Remember this video is for entertainment only, and is not a instructional video. If you plan to have work done on your own **Aircraft**, ...

pull out the brake lines

keep from losing a lot of brake fluid

remove the little pin

take the nut off

pull all your seals and washers out of your new packaging

put the o-ring into the center of that nut

take the little lock washer

start to replace the seals in the little plunger

find a washer with a little rubber o-ring

pop the snap ring

remember to lubricate the shaft with a little bit of brake

replaced the brake fluid in the cylinder

replace the pin

bleed your brakes
